

A single source of truth for certifications

d:Cert

Powered by the Dedoco Trust Engine, **dCert** empowers institutions and businesses to issue and check certifications in real time through a decentralized, tamper-proof database.

dCert reduces risk by giving recruiters, institutions and regulators access to secure, tamper-proof credentials; allowing you to issue and validate certificates that can be viewed, shared and verified from anywhere, on any device for faster business decisions.

Features & Benefits

Next-gen technology

Decentralised platform with open architecture to protect data privacy and security

Authenticity

Ensures that the certification has been issued by a registered institution

Tamper-proof credentials

Any change to certification or contents is tracked real-time

Validity

Cross-checks that the certification has not expired or been revoked

Template Library

Create certifications with custom designs, fields, and branding or use our library to pick a template.

Verifiable Audit Trail

All users can instantly verify certificates and retrieve complete document history to support audits

Distribution

Bulk certificate creation and auto-push newly issued certifications

Convenience

Integrates seamlessly with your existing suite of enterprise apps, with your branding

Shareable recognition

Share verified certificates on platforms like LinkedIn

Dedoco Trust Engine

Dedoco's suite of products lays the foundation to enable organisations to build trust and credibility in their processes. With our Next-Gen Enterprise Trust, you can **Trust, Trace and Verify** every document and record.

Infrastructure

Resilient Web3 infrastructure where tamper-proofing of documents ensures authenticity.

Hashcheck

A document hash is registered for every document & change. Verify your documents and records with complete transparency using Hashcheck.

Verification

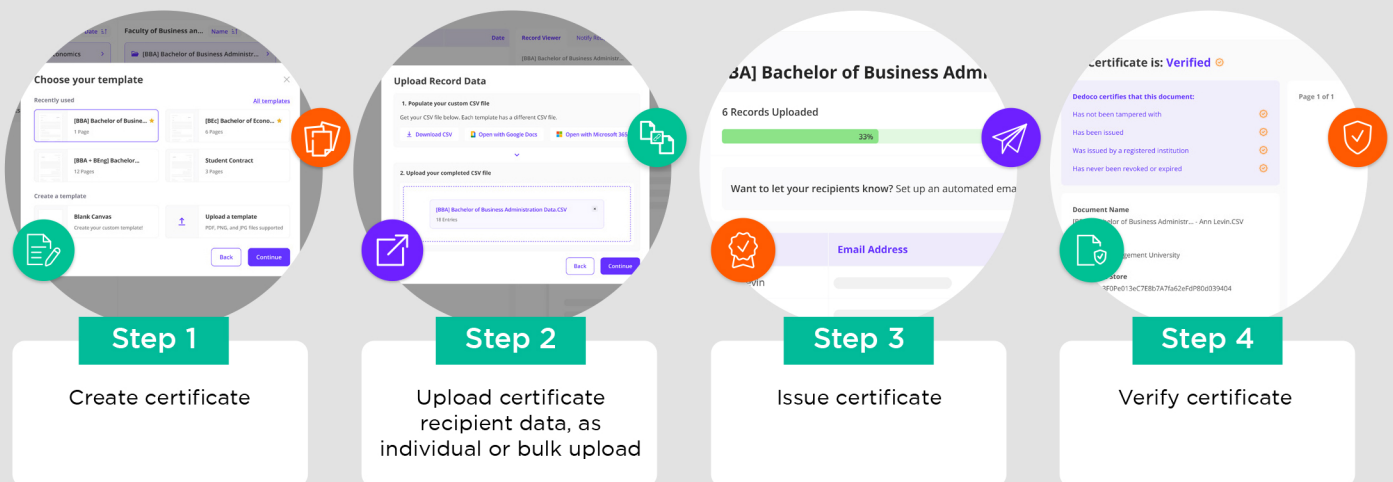

Chain of custody of a document is tracked real-time and can be instantly verified using Dedoco's audit trail

Extensive Application

Use our powerful **dCert** platform to view, authenticate and verify not just educational certificates, but any professional document that you need to check and trust in your business operations; from civic records, membership certificates to documents like credit reports or bank statements.

- **Professional Certification** : Education Certificates, Skill Certification, Professional Membership Certificates
- **Financial Services** : Credit Reports, Bank Statements, Letter of Credit - LCs
- **Healthcare** : Medical Record, Birth/Death Certificate, Vaccination Records
- **Logistics** : Bill of Lading, Shipping Order, Commercial Invoice

Have you used our powerful dCert platform yet?
