# d:Forms

Smart & secure way to create reusable documents for signatures, from a template

Powered by the Dedoco Trust Engine, **dForms** can help you create reusable templates with a variety of form fields for documents you frequently use.

Preparing and sending documents for signing has never been easier. With Dedoco's **dForms** you can set up your frequently used documents as templates to quickly and efficiently set up document workflows to get things moving. With Dedoco's Next-Gen Enterprise Trust, you can Trust, Trace and Verify every document and record within moments. Kickstart your document workflows today.

Features & Benefits

Next-gen technology
Decentralised platform with open architecture to protect data privacy and security

Tamper-proof
Any change to the form or submission is tracked real-time.

Verifiable Audit Trail
All users can instantly verify forms/documents as well as submissions and retrieve history to support audits

Convenient distribution
Share the form via email or as a shareable url to collect information and signatures

Data Bank
Capture all information entered in the fields as data for further analysis

Automate workflows
Create fields and set-up automated approver-observer-signer workflows

Dedoco Trust Engine

Dedoco's suite of products lays the foundation to enable organisations to build trust and credibility in their processes. With our Next-Gen Enterprise Trust, you can **Trust, Trace and Verify** every document and record.

Infrastructure

Resilient Web3 infrastructure where tamper-proofing of documents ensures authenticity.

Hashcheck

A document hash is registered for every document & change. Verify your documents and records with complete transparency using Hashcheck.
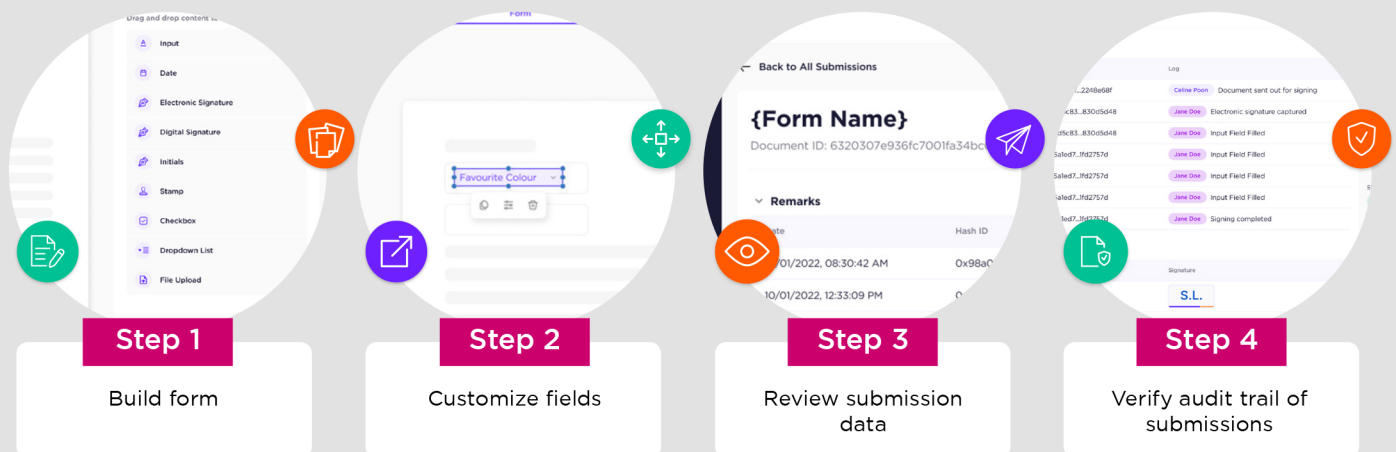

Verification

Chain of custody of a document is tracked real-time and can be instantly verified using Dedoco's audit trail

Extensive Application

Are you sending the same documents or forms (e.g. KYC, on-boarding) on a regular basis to your employees and customers? Get on dForms today to automate these documents, gather all your information in one place and streamline your business processes, saving you even more time than your regular e-signature platforms.

Have you used our powerful dForms platform yet?

Step 1

Build form

Step 2

Customize fields

Step 3

Review submission data

Step 4

Verify audit trail of submissions
